

Tpad series Outdoor HD Smart city terminal: A78-300

Tpad series Outdoor HD Smart city terminal

Main advantages:

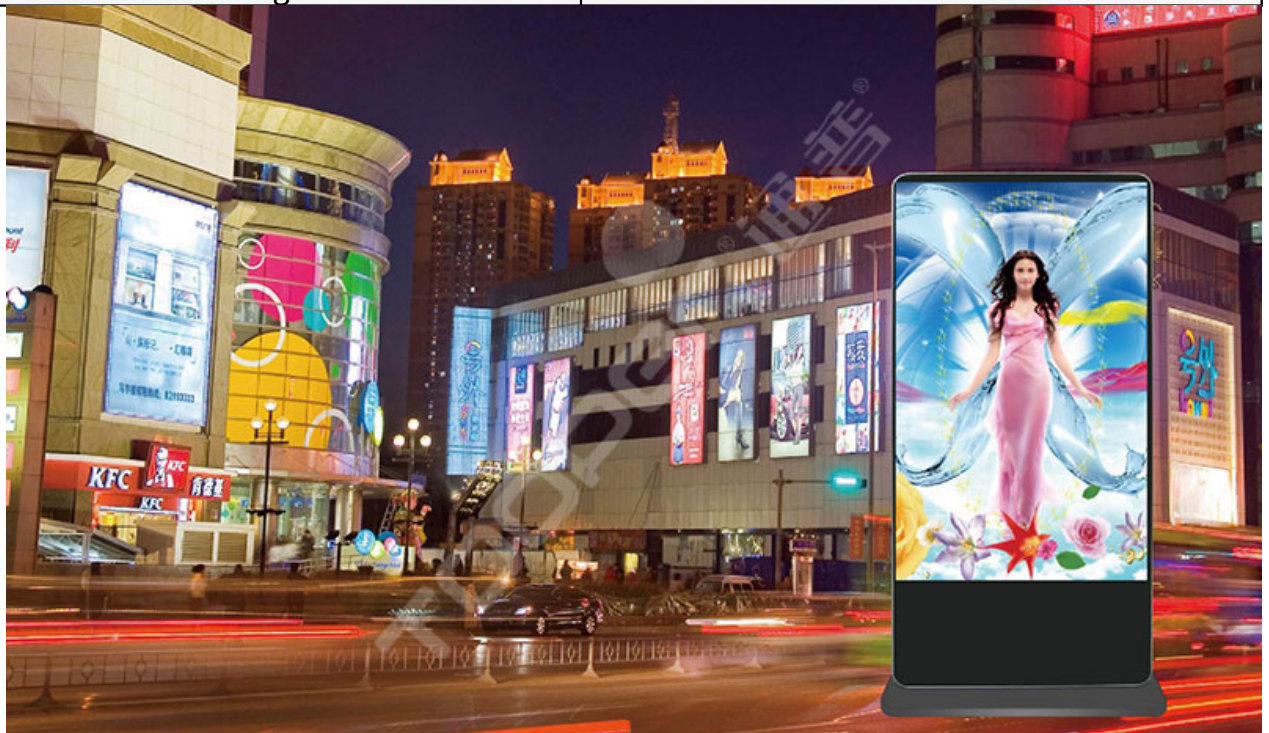

1. WIFI、 3G/4G wireless control etc, achieving the synchronous and asynchronous control ,achieving Large-scale cluster control and management, transmitting without distance limit. Intelligently response to the brightness of the outdoor environment and regulate the brightness automatically, temperature and humidity monitoring , more safety ,energy saving and environmental protection
2. It can send video or pictures by intelligent terminal APP to realize intelligent interactive with Smart Advertising player
3. Integrated WIFI multimedia intelligent terminal, can be connected through intelligent terminal free WIFI, and push the advertising information to the intelligent terminal
4. High definition and high brightness, Lifelike images, gorgeous color

5. Double side display , grand appearance , beautiful and special shape, achieving the individual design.

6. Quick installation, simple operation, convenient maintain, saving the cost greatly.

Main parameter

Technical Specification	
Part Model	A78-300
Display Area	78"
Terminal Dimension	1050x2190x95mm
Terminal Resolution	320x576
Terminal Weight	130kg
Terminal Avg. Power consumption	660 w/set
Terminal Brightness	>7000 nits
